DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, drawn to a method of preparing an aqueous peptide extract of maca.

Group II, claim(s) 6-7, 12-14, drawn to an aqueous peptide extract of maca.

Group III, claim(s) 8, drawn to a method of preparing a solid peptide extract of maca.

. Group IV, claim(s) 9-11, 23, drawn to a solid peptide extract of maca.

Group V, claim(s) 15, drawn to a method of preventing and or combating skin aging using the extract of claim 6.

Group VI, claim(s) 16, drawn to a method of combating outside aggressions chosen from sun, tobacco and stress using the extract of claim 6.

Group VII, claim(s) 20, drawn to a method of combating loss of tonicity and/or elasticity of the skin using the extract of claim 6.

. Application/Control Number: 10/561,271

Art Unit: 1655

Group VIII, claim(s) 21, drawn to a method of stimulating proliferation and growth of skin cells and fibroblasts using the extract of claim 9.

Group IX, claim(s) 22, drawn to a method of stimulating mitochondrial activity of skin cells and fibroblasts using the extract of claim 9.

Group X, claim(s) 24, 31, 33, drawn to a method of reducing the effects of aging using the extract of claim 6.

Group XI, claim(s) 25, 28, 29, 30, 32, drawn to a method of combating the loss of tonicity and/or elasticity of the skin and/or to combat the onset of senescence pigment blemishes using the extract of claim 9.

Group XII, claim(s) 26, drawn to a method of combating and/or preventing skin aging using the extract of claim 9.

Group XIII, claim(s) 27, drawn to a method of combating aggressions chosen from sun, tobacco, pollution and stress using the extract of claim 9.

The inventions listed as Groups I-XIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the extract of maca is known as is evidenced by JP 08012565 (abstract). The peptide will inherently be in the maca extract since that is where the peptide comes from. Thus, there is <u>no</u> special technical feature and a lack of unity exists.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Application/Control Number: 10/561,271

Art Unit: 1655

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Notice of Possible Rejoinder

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product

, Application/Control Number: 10/561,271

Art Unit: 1655

claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder**. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael V. Meller whose telephone number is 571-272-0967. The examiner can normally be reached on Monday thru Thursday: 9:30am-6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terry McKelvey can be reached on 571-272-0775. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
